DCS4107
URGENT - DISTRIBUTE IMMEDIATELY

Date: July 8, 2016

Subject: Additional Information Regarding Stop Delivery Order 53500

Models: 2016-2017 Buick Envision

To: All Buick Dealers

Certain 2016-2017 model year Buick Envision vehicles in new or used vehicle inventory were placed on stop delivery on July 7, 2016 due to a possible noncompliance with Federal Motor Vehicle Safety Standard (FMVSS) No. 110, "Tire Selection and Rims for Motor Vehicles." The maximum combined weight of occupants and cargo for these vehicles may be incorrectly specified on the vehicles' Tire and Loading Information labels. The correct maximum combined weight of occupants and cargo for these vehicles is 432 kg. or 952 lbs. If these vehicles are overloaded, the driver's ability to control the vehicle may be affected in certain conditions, which could increase the risk of a crash.

The purpose of this message is to advise that replacement Tire and Loading Information labels are being shipped to involved dealers of record via FedEx and are expected to be at dealers on Monday, July 11th. The corresponding recall bulletin will also be launched on that date so that dealers can immediately begin to correct involved vehicles and release them from the stop delivery order.
