New Safety Recall Advanced Communication – S62081816

FCA US LLC (“FCA US”) announced a safety recall on certain 2015 and 2016 model year (BU) Jeep Renegade vehicles equipped with a trailer hitch package (sales codes XER and XFJ).

Some of the above vehicles may have been manufactured with missing fasteners for the trailer hitch. Having missing fasteners may result in loose trailer hitch-to-body attachment and could result in a rattle at the rear of the vehicle.

If the rattling condition is ignored, this could lead to a partial or complete separation of the trailer hitch from the vehicle. Loss of the trailer hitch while driving could result in the trailer hitch and/or the trailer being towed to become a projectile, injuring pedestrians, damaging property and/or causing a crash with another vehicle(s).

FCA US will conduct a voluntary safety recall to install the missing fasteners.

Dealers will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
