New Safety Recall Advanced Communication – S63081016

FCA US LLC (“FCA US”) announced a safety recall on certain 2014 through 2016 model year (KL) Jeep Cherokee vehicles.

Some of the above vehicles may have been manufactured with a seat fastener that was not tightened to the proper torque specification. A loose seat fastener could increase the risk of injury to seat occupants during a crash event.

FCA US will conduct a voluntary safety recall to replace the affected seat sets.

Dealers will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
