RE: Stop Sale/Safety Recall: 2016 Civic VSA Software Update

Yesterday, October 6, 2016, American Honda notified NHTSA of a **Stop Sale** and **Safety Recall** for certain model year 2016 Civic vehicles due to VSA software issues that may cause problems with the electric parking brake. **Any new or used units** in dealer stock **must be repaired per service bulletin, 16-090, Safety Recall: Electric Parking Brake & VSA DTC U3000-49 Software Update.** Refer to your eResponsibility report or VIN inquiry to determine which units in your inventory are affected. American Honda expects to begin customer notification in early November 2016.

Note: Some vehicles affected by this recall may be in your new or used vehicle inventory. Failure to inspect and, if needed repair, a vehicle subject to a recall or campaign may subject your dealership to claims or lawsuits from the customer or anyone else harmed as a result of such failure. In addition, state law may provide American Honda with the right to seek indemnification in any such claim or lawsuit.

**Problem**

If the electric parking brake is operated shortly after turning the ignition off, if the VSA system is storing data, it may cause DTC U3000-49, potentially causing the BRAKE indicator to blink for 15 seconds and/or the electric parking brake to fail to set.

**Software Information**

Updated software to support this recall is available to all dealers as of October 7, 2016.

**Campaign Information**

Service bulletin 16-090 has been posted to the Service Information System as of October 7, 2016 and includes warranty, software, and update information related to the recall and product update campaigns.

**Warranty and Update Information**

Warranty and update information is detailed in service bulletin 16-090.

As always, be sure to check VIN status inquiry to determine eligibility for this or any other campaign.
