New Safety Recall Advanced Communication – S76101216

FCA US LLC (“FCA US”) announced a safety recall on certain 2016 and 2017 model year (JK) Jeep Wrangler vehicles.

Some of the above vehicles may experience no airbag and pretensioner deployment in certain crash events where airbag deployment is expected.

The front impact sensor wire(s) may become detached during a crash event before the “impact signal” was recorded by the Occupant Restraint Controller (ORC).

Failure to have airbag deployment when required during a crash event could increase the risk of injury or death to front seat occupants.

FCA US will conduct a voluntary safety recall. However, a permanent remedy for this condition is currently under development. FCA is making every effort to finalize a remedy and obtain parts as quickly as possible.

Dealers and owners will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
