## **IMPORTANT SAFETY RECALL**

**KZRV, L.P.**

**NHTSA Recall Number 16V-898**

**Transport Canada Recall Number 2016-621**

**Date: January 15, 2016**

**TO: KZRV Dealer**

### **Problem**

KZRV has decided that certain KZRV recreational vehicles were manufactured with defective hinge assemblies on the rear cargo door. The weld on the hinge assembly had been ground down during manufacturing to insure clearance when installed on a door. The grinding of the weld weakened the joint. If the door were to be opened and the hinge assembly failed, the door could come down with more force than normal. The door assembly could hit a person standing near the door and cause personal injury.

### **RANGE OF VEHICLES INVOLVED:**

- 2016 & 2017 KZRV Travel Trailers
- Models include: Venom and Durango Gold

### **WARRANTY REIMBURSEMENT:**

A notice of this recall has been sent to affected retail owners. A copy of the Owner's letter is included for your review. They may request that you complete the repair. If so, please follow the warranty reimbursement procedure. If the unit and/or units are in your inventory, or if you are requested to perform the repair for the retail customer, please complete the advised repair and send in a warranty claim referencing this recall number for reimbursement. The time allowed for repair is 60 minutes.

### **SERVICE ACTION:**

The remedy is to inspect the rear door hinge assembly and replace if necessary.
