NHTSA Recall 16V-061

IMPORTANT SAFETY RECALL

This notice applies to your vehicle: 9999999999999999

Dear JOHN Q SAMPLE:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

WHAT IS THE REASON FOR THIS NOTICE?

Honda has decided that a defect which relates to motor vehicle safety exists in certain 2007-2011 model year CR-V vehicles.

The defect in these vehicles could potentially result in serious injury or death.

Specifically, in some vehicles, the driver frontal airbag inflator could produce excessive internal pressure upon deployment. If an affected airbag deploys, the increased internal pressure may cause the inflator to rupture (break apart) and deploy abnormally. In the event of an inflator rupture, metal fragments could pass through the airbag cushion material potentially causing serious injury or death to you or others in the vehicle.

WHAT WILL HONDA DO?

Honda will replace the driver frontal airbag inflator free of charge. An illustration showing the location of the driver frontal airbag inflator, which is the only component of the airbag module (other components are the airbag cushion and airbag module cover) that will be replaced, during the recall repair, is shown on the right:

WHAT SHOULD YOU DO?

Please call any authorized Honda dealer and make an appointment to have your vehicle repaired, at no charge to you. Once you make an appointment to repair your vehicle, be advised that the complete replacement process may take approximately 45 minutes. However, your dealer can provide you with a better estimate of the overall time for this service visit, as it may be necessary to make your vehicle available for a longer period of time. If you are not the only driver of this vehicle, please advise all other drivers and passengers of this important information!
