IMPORTANT SAFETY RECALL

March 2016

This notice applies to your vehicle, **VIN:** _____

Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2016 model year Buick Regal vehicles. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- Your vehicle is involved in GM recall 21510.
- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

The power-steering assist system can fail while driving. If this occurs, the vehicle will lose power-steering assist. If power steering assist is lost, a malfunction indicator light and Service Power Steering message will illuminate on the instrument panel and a warning chime will sound. Steering control can still be maintained, but will require increased steering effort, particularly at lower speeds, which could increase the risk of a crash.

What will we do?

Your GM dealer will replace the electric belt drive rack and pinion steering gear assembly. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately 5 hours and 10 minutes.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.

Do you have questions?

If you have questions or concerns that your dealer is unable to resolve, please contact the appropriate Customer Assistance Center at the number listed below.
