

IMPORTANT SAFETY RECALL

NHTSA Recall 16V-193

Dear Nissan Maxima Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety exists in some 2016 model year Nissan Maxima vehicles. Our records indicate that you own or lease the Nissan vehicle identified by the VIN on the inside of this notice.

Reason for Recall

Your vehicle is equipped with an Antilock Brake System (ABS), which is controlled by an ABS actuator. On some of the affected vehicles, the ABS actuator may not operate properly when the ABS is activated. The standard braking system (service brake) remains operational. However, in certain circumstances, if the ABS is activated, vehicle stability could be negatively affected, which can increase the risk of a crash.

What Nissan Will Do

Your Nissan dealer will inspect the date code of the ABS actuator, and if it is within the affected range, the dealer will replace the ABS actuator with a new one at no cost to you. This repair can take up to 3 hours if your ABS actuator needs replacement. Please note that your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule. **Until you have completed this important repair, Nissan requests that you use caution while driving, especially under adverse weather conditions.**
