

# IMPORTANT SAFETY RECALL

July 2016

This notice applies to your vehicle, **VIN:** \_\_\_\_\_

Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2014-2015 model year Chevrolet Silverado Series 1500 and GMC Sierra Series 1500 vehicles. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

## IMPORTANT

- Your vehicle is involved in GM recall 15822.
- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

### Why is your vehicle being recalled?

The flexible steel cable that connects the driver’s seat belt to the outboard side of the seat (the “tensioner cable”) can fatigue and separate over time as a result of occupant movement into the driver’s seat. In a crash, a fatigued tensioner cable could break, reducing the effectiveness of the vehicle’s seat belts increasing the risk of injury to the driver.

### What will we do?

Your GM dealer will enlarge the side shield opening, install a pusher bracket on the tensioner, and if necessary, replace the tensioner assembly. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately 45 minutes.

### What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.

### Do you have questions?

If you have questions or concerns that your dealer is unable to resolve, please contact the appropriate Customer Assistance Center at the number listed below.
