IMPORTANT SAFETY RECALL

June 2016

This notice applies to your vehicle, **VIN:** _____

Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that certain 2016 model year Chevrolet Malibu vehicles fail to conform to Federal Motor Vehicle Safety Standard 126, "Electronic Stability Control Systems." As a result, GM is conducting a recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- Your vehicle is involved in GM recall 39440.
- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

The memory chip in the electronic brake control module (EBCM) may fail and cause the loss of electronically controlled brake systems, including anti-lock brakes (ABS) and electronic stability control (ESC). If the EBCM fails, the electronically controlled brake systems—e.g., ABS and ESC—will be inoperative, and the vehicle could be more difficult to control in situations where these brake systems would normally be engaged, which could increase the risk of a crash. This condition does not affect the primary braking system; the service brakes will operate normally.

What will we do?

Your GM dealer will install a replacement EBCM. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately two hours and 30 minutes.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.

Do you have questions?

If you have questions or concerns that your dealer is unable to resolve, please contact the appropriate Customer Assistance Center at the number listed below.
