**Subaru Recall Campaign TKA-16  
NHTSA Recall No. 16V-358  
July 2016 –2009 Legacy and Outback**

**Dear Subaru Owner:**

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

SUBARU OF AMERICA, INC. has decided that a defect, which relates to motor vehicle safety, exists in certain 2009 model year Subaru Legacy and Outback vehicles equipped with a non-desiccated Takata-sourced passenger side frontal air bag containing the propellant Phase Stabilized Ammonium Nitrate.

You received this notice because our records indicate that you currently own one of these vehicles.

### DESCRIPTION OF THE SAFETY DEFECT AND SAFETY HAZARD

The affected vehicles are equipped with a Takata-sourced passenger side frontal air bag that may be susceptible to moisture intrusion. Over time, that could cause the inflator to rupture when the passenger's frontal air bag deploys in a crash. If the inflator ruptures, metal fragments could strike vehicle occupants, potentially resulting in serious injury or death.

### WHAT YOU SHOULD DO

You should immediately contact your Subaru retailer (dealer) for an appointment to have the front passenger air bag inflator replaced with a new one.

***Until this repair is performed, do not allow passengers to ride in the front passenger seat.***

### WHAT WE WILL DO

Subaru will replace the inflator for your front passenger air bag at no cost to you.

### HOW LONG WILL THE REPAIR TAKE?

The time to replace the front passenger air bag inflator will take approximately 1 hour and 45 minutes. It may be necessary to leave your vehicle for a longer period of time.

Please present this letter to your Subaru retailer at the time this repair procedure is performed.
