What is the issue? In certain vehicles, a power supply component in the airbag control unit may corrode and cause the unit to fail. If the airbag control unit fails, the airbag warning light in the instrument panel will illuminate, and safety systems such as seat belt pretensioners and airbags may not deploy in the event of a crash, increasing the risk of occupant injury.

What will we do? To help identify/correct this defect, your authorized Audi dealer will replace the airbag control module in your vehicle. This work will take about two hours to complete and will be performed for you free of charge.

What should you do? Please contact your authorized Audi dealer without delay to schedule this recall repair. For your convenience, you can also visit www.audiusa.com and click on the "Find a Dealer" link to locate a dealer near you and schedule this service.

Precautions you should take If the airbag warning light on the instrument panel is on, make an appointment with your authorized Audi dealer to have the vehicle inspected without delay. See the owner's manual for additional information about the airbag warning light.

Lease vehicles and address changes If you are the lessor and registered owner of the vehicle identified in this action, the law requires you to forward this letter immediately via first-class mail to the lessee within ten (10) days of receipt. If you have changed your address or sold the vehicle, please fill out the enclosed prepaid Owner Reply card and mail it to us so we can update our records.

Reimbursement of Expenses If you have previously paid for repairs relating to the condition described in this letter, the enclosed form explains how to request reimbursement. We would be pleased to review your reimbursement request.

Can we assist you further? If your authorized Audi dealer fails or is unable to complete this work free of charge within a reasonable time, please contact Audi Customer Experience at 1-800-253-2834 or via our "Contact Us" page at www.audiusa.com.
