 Safety Advisory: July 22, 2016

IMPORTANT SAFETY RECALL

This notice applies to your vehicle: «VIN»

«Owner_name»
 «Street»
 «City», «State» «Zip»

Dear «Owner_name»:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. KZRV has decided that a defect which relates to motor vehicle safety exists in certain 2016-2017 Model Year KZRV Spree vehicles. As a result, KZRV is conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

Reason for this recall

The vehicles subject to this recall were built with the refrigerator exhaust vent located in the wrong location. In addition, an internal baffle may also not be properly located. An improperly located vent location may cause the refrigerator compartment to overheat which would trigger the high temperature sensor and result in the refrigerator shutting down. If the high temperature sensor on the refrigerator fails to shut the refrigerator down there could be a risk of fire.

What we will do

The remedy is to install a larger exhaust vent and relocate an internal baffle, if necessary. This defect will be corrected at no expense to you, the owner. The repair should take approximately 4 hours if you own a Spree model 337RES and 9 hours if you own a Spree model 339RKS.
