July 21, 2016

Dear Kia Sorento Owner:

Kia has identified a defect in your vehicle which relates to motor vehicle safety.

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Kia Motors has decided that a defect which relates to motor vehicle safety exists in certain 2016 model year Kia Sorento vehicles.

What Is The Problem?

Due to a manufacturing error at the supplier, the rear assist arm bracket may not have been welded properly to the rear crossmember. If the rear assist arm bracket breaks away from the rear crossmember while your vehicle is in motion, one of the rear wheels will become misaligned, which may increase the risk of a crash.

Kia Will Inspect And If Necessary, Replace the Rear Crossmember Assembly At No Cost For Parts Or Labor To You.

Kia has advised its authorized Kia dealers to inspect the welds on the rear assist arm bracket, and if the issue exists, to replace the rear crossmember assembly. The work will be performed at Kia's expense at no cost to you. The estimated time which will be required to inspect your vehicle is approximately one hour. If replacement is needed, additional time will be required.
