IMPORTANT SAFETY RECALL

This notice applies to your vehicle, VIN: XXXXXXXXXXXXXXXXXXXX

Dear Hyundai Elantra Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Hyundai has decided that a defect which relates to motor vehicle safety exists in certain Model Year 2013 Hyundai Elantra sedan vehicles manufactured at Hyundai Motor Manufacturing Alabama from January 23, 2013 through April 30, 2013. Our records indicate that your vehicle falls within this production date range.

What is the problem?

- A “stopper pad” located between the stop lamp switch and the brake pedal arm may deteriorate, allowing the stop lamp switch plunger to remain extended when the brake pedal is released. A deteriorated pad can result in the stop lamps illuminating continuously, illumination of the Electronic Stability Control warning lamp, the ability to move the shift lever without depressing the brake pedal, or activation of the engine management system’s brake pedal override feature. Any of the described symptoms could increase the risk of a crash. A deteriorated stopper pad does not affect the performance of the vehicle’s service brake system.

What will Hyundai do?

- Your Hyundai dealer will replace the stopper pad on your vehicle with a revised service part. This procedure will be performed at no charge to you. The actual time required to perform the procedure should be less than 1 hour, however your vehicle may be needed longer; therefore, we recommend scheduling a service appointment to minimize inconvenience.

What should you do?
