

IMPORTANT SAFETY RECALL

August 2016

This notice applies to your 2016 Buick Verano. The applicable Vehicle Identification Number (VIN #) can be found printed on the address label of the envelope.

Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2016 model year Buick Verano vehicles equipped with a 2.0L turbocharged engine. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- Your vehicle is involved in GM recall 54180.
- Schedule an appointment with your Buick dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

The engine fuel line assembly in these vehicles may have been manufactured incorrectly, causing the fuel line to be misrouted over the engine surface during vehicle assembly. Misrouted fuel lines may contact the hot surface of the turbocharged engine, which may degrade and wear the fuel line's outer surface. If fuel lines contact the hot engine surfaces, the fuel line material may degrade and fail, causing fuel to leak and increasing the risk of an engine fire.

What will we do?

Your Buick dealer will replace the fuel line assembly. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately 2 hours and 20 minutes.

What should you do?

You should contact your Buick dealer to arrange a service appointment as soon as possible.

Do you have questions?

If you have questions or concerns that your dealer is unable to resolve, please contact the appropriate Customer Assistance Center at the number listed below.
