IMPORTANT SAFETY RECALL

Brake Indicator Lamp

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA has decided that certain [2003 through 2006 model year Dodge Sprinter] vehicles fail to conform to Federal Motor Vehicle Safety Standard (FMVSS) No. 105 – HYDRAULIC AND ELECTRONIC BRAKE SYSTEMS.

It is extremely important to take steps now to repair your vehicle to ensure the safety of you and your passengers.

WHY DOES MY VEHICLE NEED REPAIRS?

The instrument panel cluster brake indicator lamp on your vehicle may not illuminate during the lamp function check when the ignition switch key is turned to the on (run) position. Therefore, the driver may be unaware if the brake indicator lamp is not working. **If the brake indicator lamp fails, the driver will not be notified in a low brake fluid situation, increasing the risk of a crash.**

This is non-compliant with regulatory requirements because the brake lamp is required to illuminate briefly when the ignition switch key is turned to the on (run) position.

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE

FCA will repair your vehicle ^[2] free of charge (parts and labor). To do this, your dealer will inspect the instrument panel cluster brake indicator lamp operation and if not activated, use a scan tool to activate the brake indicator lamp. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit. Your time is important to us; please be aware that these steps may require more time. The estimated repair time is one hour. We recommend that you schedule a service appointment to minimize your inconvenience. Please bring this letter with you to your dealership.
