IMPORTANT SAFETY RECALL 16510

DECEMBER 2016

Dear IC Bus Customer,

This notice applies to your vehicle identified on the enclosed card. This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

IC Bus has decided that a defect which relates to motor vehicle safety exists in certain 2011 through 2016 BE and CE school bus models built 3 November 2009 thru 26 February 2016 with feature code 48PPJ or 48PPP (water shut off valve, inside forward of driver heater).

REASON FOR THIS RECALL

The formed heater hose to the driver's heater over time may fatigue resulting in a split hose which could cause hot engine coolant to leak into the operator's foot area.

RISK TO MOTOR VEHICLE SAFETY

If the hose were to burst, the hot coolant spilling into the operator's foot area could result in a burn injury or possible sudden lateral vehicle movement which could result in a motor vehicle crash.

DEFECT REMEDY

The repair will involve replacement of the formed heater hose. Dealers have parts and instructions to repair your vehicle. The repair will be performed free of charge and take approximately 45 minutes to complete.
