NHTSA RECALL 16V-847

Dear Nissan Titan owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety exists in some 2016 Model Year Nissan Titan Diesel XD vehicles. Our records indicate that you own or lease the Nissan vehicle identified by the VIN on the inside of this notice.

Reason for Recall

On certain Model Year 2016 Nissan Titan Diesel XD vehicles the fuel tank breather tube may have been installed incorrectly due to an assembly error. In some cases, this may result in the fuel gauge, and the separate distance to empty meter, to both display inaccurately. If this occurs, the vehicle could run out of fuel without normal warnings to the driver, which may increase the risk of a crash.

What Nissan Will Do

Owners of all potentially affected vehicles are asked to take their vehicle to a Nissan dealer for a remedy. The fuel tank assembly in your vehicle will be inspected. In some instances, components including the fuel tank breather tube, the fuel sending unit, and the fuel tank, may need to be replaced. This service, free for parts and labor, can take up to two (2) hours to complete depending on the remedy required. Your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

What You Should Do
Qué Debes Hacer

Contact any Nissan dealer at your earliest convenience in order to arrange an appointment to have your vehicle repaired. Please bring this notice with you to your service appointment.
