

Safety Chain Replacement Instructions on Destination Campers

1. Locate safety chain attachment points on the underside of the A-Frame near the hitch point of the travel trailer.
2. Remove safety chains by cutting the attachment point that is attaching safety chain to the frame of the travel trailer.
3. Attach appropriately rated safety chain (part # 0243453) using _____ bolt and nut making sure that the nut is tightened.
4. Repeat steps 1-3 for the other safety chain.
5. Check to ensure that both safety chains are securely mounted to the frame.
6. Heartland RV will allow 1.0 hours labor plus the cost of the appropriate safety chains for the repair. Labor code 99.01.26
