

V.I.N. TAG REPLACEMENT INSTRUCTIONS

Section 1 – will not be used
Section 2 – tire information

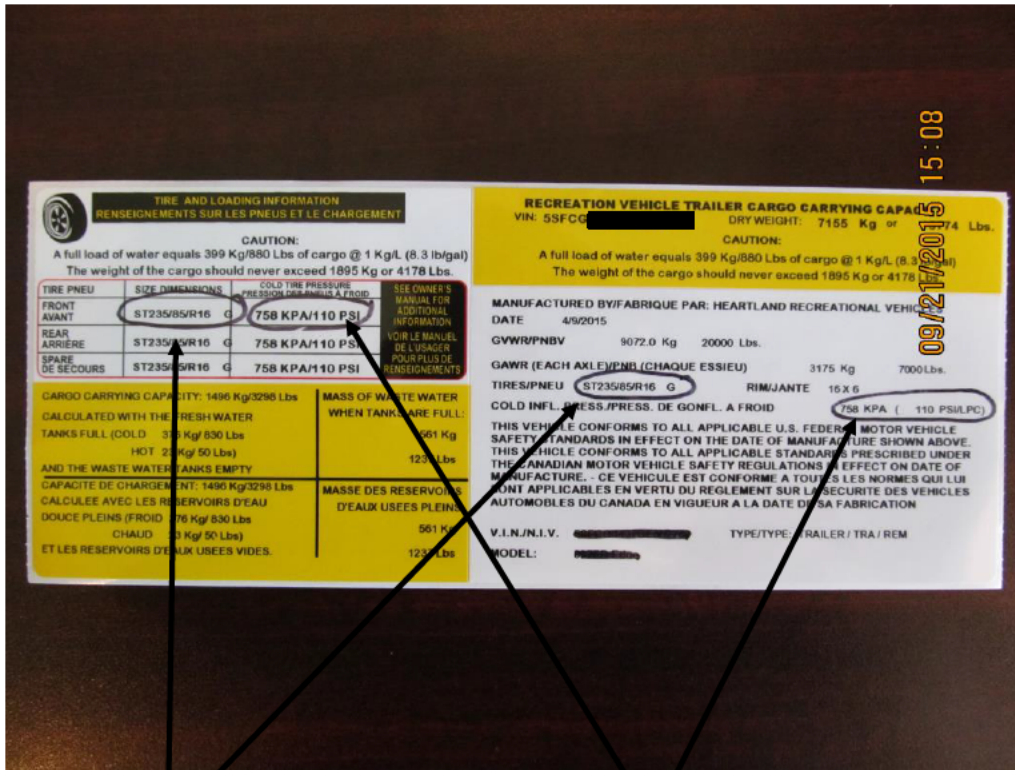

Section 3 – cargos capacities
Section 4 – Federal ID

The VIN tag is broken into 4 sections you will need to replace sections 2 & 4 so that all information is updated correctly.

****IMPORTANT: DO NOT APPLY NEW LABELS OVER THE EXISTING LABELS.**

Locate the tire information label and Federal ID labels on the off door side or driver side of the Recreational Vehicle. You will need to match the tire size and air pressure ratings to the tire sidewall that is on the RV. If they match nothing else needs completed, if they do not match proceed to replacing the labels.

V.I.N. TAG REPLACEMENT INSTRUCTIONS

Tire Size

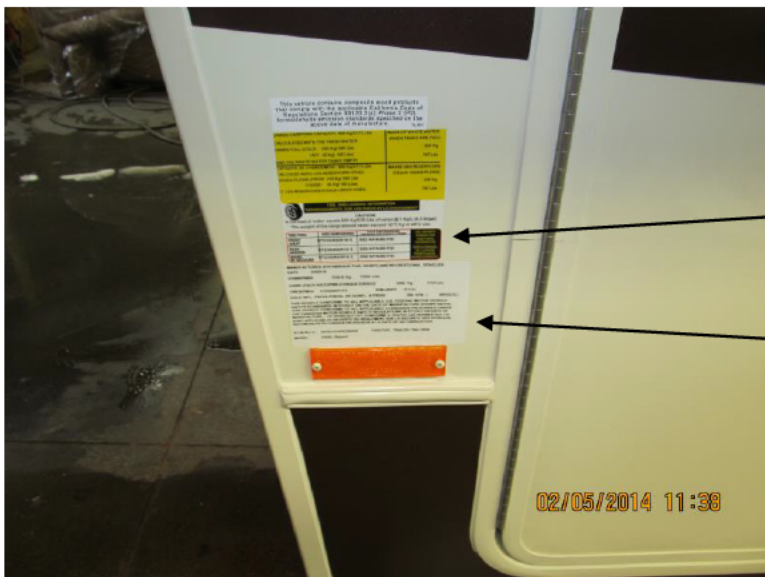

Air pressure

**If the information is incorrect and does not match proceed to the next line.

Call Heartland customer service to request the replacement label. Must have the VIN #.

Locate the tire information label and Federal ID labels on the off door side or driver side of the Recreational Vehicle. Use a razor blade or scraper to peel one corner up, grasp the label and pull. *note that the entire label will not be removed, the backing will remain.

Apply the new label directly over the area of the old label, both labels must be replaced. File claim under 99.01.25.B which covers both the inspection and the replacement.
