Monday-Friday, 7 a.m. to 7 p.m. CT,  
Saturday, 7 a.m. to 5 p.m. CT.

## FAST

This repair on your <Year><Model> will take approximately <Hours>.

Dear <John>,

Our records indicate that this URGENT SAFETY RECALL has not been completed on your vehicle.

Your <Year><Model> is equipped with side Curtain-Shield-Airbags (CSAs) which deploy from the roof rails in the event of certain types of crashes. Due to improper programming in the airbag control module, there is a possibility that, under certain specific and limited conditions shortly after vehicle startup, the CSAs and seat belt pretensioners could unnecessarily activate. Unexpected activation of the CSAs could increase the **RISK OF INJURY** to the occupant.

Debido a programación incorrecta en el módulo de control de la bolsa de aire, existe la posibilidad de que, bajo ciertas condiciones específicas y limitadas poco después del arranque del vehículo, las bolsas de aire laterales protectoras de cortina y los sensores de tensión del cinturón de seguridad podrían activarse innecesariamente. La activación inesperada de las bolsas de aire laterales protectoras de cortina podría aumentar el **RIESGO DE LESIONES** al ocupante.
