IMPORTANT SAFETY RECALL

(NHTSA Recall Number: 16V-070)
This notice applies to your vehicle: (Insert VIN)

March 30, 2016

Dear Kia Forte Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Kia Motors has decided that a defect which relates to motor vehicle safety exists in certain 2011 model year Forte vehicles equipped with automatic transmissions. Our records indicate that you own or lease one of the potentially affected vehicles.

What Is The Problem?

The automatic transmission fluid cooler hose in your vehicle may have been improperly cured during the manufacturing process, thereby increasing the possibility of transmission fluid leaking from the hose. Leaking transmission fluid may result in the illumination of the Malfunction Indicator Lamp (MIL) and/or abnormal transmission shifting. Depending upon the amount of transmission fluid lost, reduced vehicle mobility may occur, increasing the risk of a crash.

What Will Kia Do?

Kia has advised its authorized Kia dealers to replace the transmission fluid cooler hose with a new improved one. The work will be performed at Kia's expense at no cost to you. The estimated time which will be required to repair your vehicle is approximately one (1) hour.

What Should You Do?

- Please contact your Kia dealer to arrange for the repair to be conducted as soon as possible.
- If you notice a significant amount of transmission fluid loss, you may request your vehicle be towed to the nearest Kia dealer at no cost to you by phoning Kia Roadside Assistance at (800)-333-4KIA (4542).

What If You Have Already Paid To Have This Situation Corrected?
