

**IMPORTANT SAFETY RECALL SC0403  
NHTSA RECALL # 16V-099**

**DEAR MACK TRUCK OWNER:**

**You are receiving this second notice because, according to our records, this safety recall repair still needs to be completed.**

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Mack Trucks, Inc. has decided that a defect which relates to motor vehicle safety exists in certain 2012 through 2015 model Mack Pinnacle (CHU, CXU), Granite (GU), TerraPro (LEU MRU), and Titan (TD) trucks manufactured from September 1, 2011 through September 8, 2015 with a Mack proprietary axle.

**SAFETY DEFECT:**

The cap nut that retains the interaxle driveshaft yoke to the rear axle input shaft may be subject to premature loosening. If the nut comes off, the yoke can separate from the axle input shaft and cause the drive shaft to disconnect.

**SAFETY RISK:**

A disconnected drive shaft can disable the truck and result in debris on the roadway, which increases the risk of a vehicle crash.

**PRECAUTIONS YOU CAN TAKE:**

There are no precautions you can take other than having your vehicle inspected and repaired by a Mack Parts and Service Center.

**TIME REQUIRED FOR THE REPAIR:**

The time required to repair your vehicle is approximately 2 hours.

**WHAT YOU SHOULD DO:**

You should contact the nearest Mack Parts and Service Center and make an appointment. Mack dealers will replace the cap nut and the threads on the input shaft inspected and repaired by replacement if required at **no charge** to you.

You can locate the closest Mack Parts and Service Center by going on line to <http://www.macktrucks.com/> and selecting “Dealer & Service Locations” or by calling our toll-free number: 1-800-866-1177.
