NHTSA Recall 16V-061

IMPORTANT SAFETY RECALL

This notice applies to your vehicle: 9999999999999999

Dear JOHN Q SAMPLE:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

What is the reason for this notice?

Acura has decided that a defect which relates to motor vehicle safety exists in certain 2009-2014 model year TL vehicles.

The defect in these vehicles could kill or injure you or other people in your vehicle.

Specifically, in some vehicles, the driver's front airbag inflator could produce excessive internal pressure upon deployment. If an affected airbag deploys, the increased internal pressure may cause the inflator to rupture (break apart) and deploy abnormally. In the event of an inflator rupture, metal fragments could pass through the airbag cushion material possibly causing serious injury or fatality to you or others in the vehicle. Past ruptures like this have killed and injured vehicle drivers.

What should you do?

The remedy parts needed to conduct airbag inflator replacements will become available in the Summer of 2016. Acura will send you another letter when parts become available to repair your vehicle.

Until parts become available for repairs, please feel free to discuss your specific needs and concerns with your dealer, including the provision of, or reimbursement for, temporary alternative transportation, as necessary. You may also contact Acura's Client Relations (at the number listed below) to address your needs and concerns.
