Why is my vehicle being recalled?

The front passenger airbag inflator may rupture, due to excessive internal pressure, during normal airbag deployment events. This condition is more likely to occur if your vehicle has been exposed to high levels of absolute humidity for extended periods of time.

What is the risk?

An inflator rupture may result in metal fragments striking the vehicle occupants resulting in serious injury or death.

How do I resolve this important airbag issue?

Parts required to provide a permanent remedy for this condition are not currently available. We are making every effort to obtain these parts as quickly as possible, and will service your vehicle free of charge (parts and labor).

What do I need to do?

FCA US will contact you again, by mail, with a follow-up recall notice when remedy parts are available. Once you receive your follow-up notice, simply contact your Chrysler, Jeep, Dodge or RAM dealer right away to schedule a service appointment^[2]. Additional options for your next steps are included on the left side of this notification. We appreciate your patience.

If you have already experienced this specific condition and have paid to have it repaired, you may visit www.fcarecallreimbursement.com to submit your reimbursement request online^[3]. Once we receive and verify the required documents, reimbursement will be sent to you within 60 days. If you have had previous repairs performed and/or already received reimbursement, you may still need to have the recall repair performed.

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this matter.
