RE: Safety Recall P081: Takata Passenger Airbags

Vehicle Affected: Range Rover

Model Year: 2007-2011

National Highway Traffic Safety Administration (NHTSA) Recall Number: 16V-374

Dear Range Rover Owner,

This notice is sent to you in accordance with the requirements of the *National Traffic and Motor Vehicle Safety Act*. Land Rover North America has decided that a defect relating to motor vehicle safety exists in certain 2007-2011 model year Land Rover Range Rover vehicles.

Your vehicle is included in this Safety Recall.

What is the concern?

Due to prolonged exposure to combined high heat and humidity, the front passenger airbag module inflator housing may rupture and deploy abnormally in the event of a crash necessitating deployment of the front passenger airbag. In such event, a front passenger airbag module inflator housing rupture could result in metal fragments striking the passenger or other occupants, resulting in serious injury or death.

What will Land Rover North America and your Land Rover retailer do?

Land Rover North America is carrying out a recall of certain Range Rover vehicles within the model years mentioned above. However, we currently do not have stock of the necessary components to repair your vehicle. We are working closely with our suppliers to produce components for this repair as quickly as possible.

When the components become available, you will be notified by a second mailing and instructed to take your vehicle to a Land Rover retailer who will replace the front passenger airbag module.

There will be no charge for this repair.

What should you do?

When you receive a follow-up notice, please contact your authorized Land Rover retailer to schedule an appointment to have Safety Recall 'P081' completed on your vehicle. In the meantime, if you have any questions or concerns, please use the contact information further below.
