Information about Safety Recall 6901 – Airbag Control Module

**THIS RECALL REPAIR IS NOT YET AVAILABLE.** We will send another letter as soon as the recall work can be completed on your vehicle.

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Audi has decided that a defect, which relates to motor vehicle safety, exists in certain 2008-2009 model year Audi A5 coupe, 2009 model year Audi A4 sedan, A4 Avant and Q5, and in 2010 model year Audi A5 Cabriolet vehicles. Our records show that you are the owner of a vehicle affected by this action. At this time, the recall repair is not yet available.

**Recall Description:** In certain vehicles, a power supply component in the airbag control unit may corrode and cause the unit to fail. If the airbag control unit fails, safety systems such as seat belt pretensioners and airbags may not deploy in the event of a crash, increasing the risk of occupant injury.

**Precautions You Should Take:** If your vehicle is operating normally, there is nothing you need to do at this time. However, if the airbag warning light on the instrument panel is on, make an appointment with your authorized Audi dealer to have the vehicle inspected without delay.
