

IMPORTANT SAFETY RECALL

S55 / NHTSA 16V-529

This notice applies to your vehicle (VIN: xxxxxxxxxxxxxxxxx).

This interim notification letter is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Dear: (Name)

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain 2014 and 2015 model year (KL) Jeep Cherokee; 2015 model year (BU) Jeep Renegade, (UF) Chrysler 200, (VM) RAM ProMaster City vehicles and 2016 model year (FB) Fiat 500X vehicles equipped with a 9-speed transaxle.

The problem is... The transaxle wire harness on your vehicle may have been built with insufficient wire terminal crimp(s). This may cause an intermittent high electrical resistance in the transaxle wire harness circuit(s). A high resistance circuit(s) in this wiring harness will cause the on-board diagnostic system to set a Diagnostic Trouble Code (DTC). When the DTC is set, the system defaults the transaxle to neutral and the customer experiences a loss of motive power. Motive power can usually be regained upon a restart. The loss of motive power could cause a crash without warning.

What your dealer will do... FCA intends to repair your vehicle free of charge (parts and labor). However, the parts required to provide a permanent remedy for this condition are currently not available. FCA is making every effort to obtain these parts as quickly as possible. FCA will contact you again by mail, with a follow-up recall notice, when the remedy parts are available.

What you must do to ensure your safety... Once you receive your follow-up notice in the mail, simply **contact your Chrysler, Jeep, Dodge, or RAM dealer right away** to schedule a service appointment.

If you need help... If you have questions or concerns which your dealer is unable to resolve, please contact the FCA Recall Assistance Center at 1-800-853-1403.
