Subject: Update - Recall 16V-071: Driver's Front Air Bag Module

This is an update on the Voluntary Safety Recall involving Driver-Side Front Air Bag Module on certain BMW vehicles that are equipped with non-desiccated Takata PSDI-5 inflators. These vehicles, covering model years 2006-2015 have not been part of earlier Takata-related air bag recalls. There are approximately 840,000 vehicles in the US.

We are pleased to announce that the first parts shipment for the E70, E71, E72, and E84 have arrived.

An initial number of gas generators has been sent to dealers and will arrive starting, May 19, 2016. More parts for dealer inventory vehicles will follow shortly in small batches. These parts are pushed out to you by BMW. These are VIN specific parts to be installed in used X1, X5 and X6 vehicles in dealer inventory.

Dealer should only order parts for customer vehicles. Parts for used vehicles and in stock vehicles will be pushed out by BMW. The PO number of the order will be the VIN number of the vehicle.

Affected vehicles, which require this Recall, have been identified and will display under "Open Campaign" in DCS Warranty or ISPA Light.

To assist you with challenging concerns, please reference the attached documents: updated Q&A, SI B65 14 16.

Please be reminded that it is a violation of the National Traffic and Motor Vehicle Safety Act for you to sell, lease or deliver any new vehicle subject to this recall, until the repair has been performed.

You also may not use or sell replacement parts subject to this safety recall. Substantial civil penalties apply to violations of this law.

In addition, you should not sell, lease or deliver any Certified Pre-Owned or used vehicles in your inventory that is subject to this safety recall, until the repair is completed.

Please follow any special instructions that we provide to you for the return or disposition of recall parts.

Sincerely,

Technical Service

Merita Fitzgibbon
