

IMPORTANT: SAFETY RECALL REMINDER

In March 2016, we notified you of a Safety Recall involving the rear brake line on your 2014 Honda Forza (NSS300/A) scooter. At the time, we advised owners of the following:

Honda has determined that a defect which relates to motor vehicle safety exists in certain 2014 model year Honda Forza (NSS300/A) scooters. During assembly of the rear brake line, the rear brake line joint may have been improperly torqued. If the rear brake line joint is improperly torqued, brake fluid may leak causing a reduction or loss of rear brake pressure. A reduction or loss of rear brake pressure increases the risk of a crash.

According to our records, you have not yet had your affected scooter repaired. Please call your authorized Honda scooter dealer to schedule an appointment as soon as possible. This recall repair will be performed free of charge.

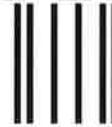

If your scooter has already been repaired, or if you no longer own this scooter, please let us know by filling out the included, postage paid, *Information Change Card*. We will update our records and stop sending you reminder notices.

If you have any questions about this recall, your authorized Honda scooter dealer will be happy to assist you.

Sincerely,

**American Honda Motor Co., Inc.
Motorcycle Division**
