2013 Husqvarna TR 650 Strada + TR 650 Terra / Stalling issue

Dear Bob,

KTM North America, Inc. has determined that a defect which relates to motor vehicle safety may exist on certain 2013 Husqvarna TR 650 Strada and Terra motorcycles.

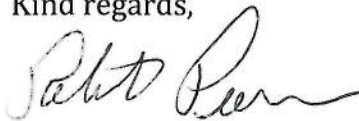

During operation the engine could stall without warning when the clutch is pulled in. This could increase the risk of a crash and possibly lead to personal or property damage.

At this time KTM North America, Inc. is still investigating the cause in collaboration with the supplier of the fuel management system (Magneti Marelli) and BMW, who owned the Husqvarna brand at the time the potentially affected vehicles were manufactured.

Once determined, KTM North America, Inc. will inform you of the remedy to correct the defect.

Should you have any questions in the meantime, please don't hesitate to contact me.

Kind regards,

Robert Pearce
Vice President of Operations
KTM North America, Inc.
