Update on Recall Involving Certain G12 (New 7 Series) Vehicles: Initial Shipment of Parts Underway

 April 12, 2016

This is an update on the Voluntary Safety Recall involving certain 7 Series (G12) vehicles that require replacement of the Electronic Control Unit for the Air Bags. This is UNRELATED to the Takata airbag recall. Initial parts shipments are underway; here's what your team needs to know.

Colleagues –

We are pleased to announce that the first parts shipments of the Electronic Control Unit for the air bags in affected G12 vehicles have arrived in the US this week.

Since supply is still limited, we are applying a special process for parts allocation. For more information, [please click here for the parts and service bulletin](#).

Please work with your local and regional BMW market teams to minimize the impact for our customers.

We are working to ensure that we have sufficient inventory for a single letter (final) customer notification, starting in mid-May.

For additional information on this recall, [please click here for Frequently Asked Questions](#).
