

## Update 7.29.16: Takata Airbag Recall

July 29, 2016

As previously communicated here, this section of BMW Dealer Direct will include key summaries of new developments related to recalls, including the industry-wide Takata airbag recall. Please read on for an important update to Takata-related tools and programs.

In light of these changes, and to reduce confusion by conveying information that is no longer applicable, we will no longer update the Dealer Communication Toolkit. We recommend that you direct any further questions regarding the Takata recall to your Area Manager or Aftersales Area Manager. Here is a summary of the latest changes.

### What is Continuing:

- BMW NA will continue to offer dealers a monthly financial assistance package **ONLY** for those Affected Vehicles that are also under stop sale for the passenger side airbag (Recall 16V-364).
- All Affected Vehicles that were in POIS prior to February 15th will be paid a re-inspection allowance for CPO vehicles and for non-CPO vehicles upon RDR once the vehicle is remedied.
- BMW NA will continue to “push out” replacement parts on a VIN specific basis triggered by POIS inventory data, in accordance with the mandated priority schedule. X3 (E83) parts to begin shipping 1<sup>st</sup> week of August.
