OMB Control No.: 2127-0004

Part 573 Safety Recall Report

17V-026

Manufacturer Name: Subaru of America, Inc.

Submission Date: JAN 11, 2017 NHTSA Recall No.: 17V-026 Manufacturer Recall No.: TKB-17

Manufacturer Information:

Manufacturer Name: Subaru of America, Inc.

Address: P.O. Box 6000

Cherry Hill NJ 08034-6000

Company phone: 856-488-8500

Population:

Number of potentially involved: 69,529 Estimated percentage with defect: NR

Vehicle Information:

Vehicle 1: 2005-2006 Subaru Baja

Vehicle Type: LIGHT VEHICLES

Body Style : SUV Power Train : GAS

Descriptive Information: Not all vehicles in the specified production date range are affected by this recall. This

recall affects Takata Non-Desiccated Frontal Passenger-side Air Bag Inflators containing Phase Stabilized Ammonium Nitrate for Zone B, for vehicles not already

covered under NHTSA Campaign Numbers 14V763, 15V323 and 16V359.

Zone B includes states with moderate temperature cycling and absolute humidity. It includes: Arizona, Arkansas, Delaware, District of Columbia, Illinois, Indiana, Kansas, Kentucky, Maryland, Missouri, Nebraska, Nevada, New Jersey, New Mexico, North Carolina, Ohio, Oklahoma, Pennsylvania, Tennessee, Virginia, and West Virginia.

Production Dates: APR 27, 2004 - APR 12, 2006

Production Dates: JUN 16, 2005 - MAY 28, 2009

Description of Defect:

Description of the Defect: Takata has submitted DIR 17E-002 (Zone B) in accordance with the terms

specified in the May 4, 2016 Amendment to the November 3, 2015 Consent

End: NR

Order in EA15-001.

NR

Subaru is submitting this DIR in accordance with section 46 of Coordinated

Remedy Order.

FMVSS 1: NR FMVSS 2: NR

VIN Range 1 : Begin :

Description of the Safety Risk: Activation of a non-desiccated ammonium nitrate inflator with degraded

propellant may result in an inflator rupture. An inflator rupture may cause metal fragments to pass through the air bag and into the vehicle interior at

high speed, which may result in injury or death to vehicle occupants.

Description of the Cause: Based upon Takata's investigation to date, the propellant wafers in some of the

subject inflators may degrade over time, which could lead to overaggressive combustion in the event the air bag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may

cause the inflator body to rupture.

Identification of Any Warning None

that can Occur:

Supplier Identification:

Component Manufacturer

Name: Takata Corporation

Address: Tokyo Front Terrace 19F

2-3-14 Higashishinagawa Shinagawa-ku, Tokyo FOREIGN STATES 140-0002

Country: Japan

Chronology:

November 3, 2015 - NHTSA and Takata entered into a Consent Order in EA15-001 to resolve issues raised in that investigation, to mitigate and control risks of harm, and to promote public safety.

May 4, 2016 - NHTSA and Takata entered into an Amendment to the November 3, 2015 Consent Order. As stated in that Amendment, on the basis of testing and analysis conducted by Takata and by independent research organizations, NHTSA has concluded that, "at some point in the future all non-desiccated frontal Takata PSAN inflators will reach a threshold level of degradation that could result in the inflator becoming unreasonably dangerous." As a result of this conclusion, and pursuant to Paragraph 29 of the November 3, 2015 Consent Order, NHTSA ordered Takata to file certain defect information reports ("DIR"), in accordance with the schedule set forth in Paragraph 14 of the Amendment.

May 16, 2016 - As specified in that schedule, Takata submitted the DIR.

May 20, 2016 - Subaru has determined to launch recall according to Section 46 of Coordinated Remedy Order. January 3, 2017 - As specified in that schedule, Takata submitted the DIR.

January 10, 2017 - Subaru has determined to launch recall according to Section 32 of 3rd amended Coordinated Remedy Order.

Description of Remedy:

Description of Remedy Program: The remedy plan calls for dealers to replace the passenger airbag inflator.

How Remedy Component Differs NR from Recalled Component:

Identify How/When Recall Condition NR was Corrected in Production :

Recall Schedule:

Description of Recall Schedule: If parts supply is sufficient, Subaru will send owner notification letters

advising the customer to schedule a repair. If parts supply is insufficient, Subaru will send interim notification letters advising the customer they

are affected and will be re-notified when parts supply improves.
