Chronology :

After a routine review of the draft 2018 Silverado and Sierra owner's manuals, a GM engineer discovered that certain sections relating to child-restraint anchorage systems were missing and submitted the issue on March 31, 2017 as a potential safety issue through GM's Speak Up For Safety Program. On June 9, 2017, GM opened a formal safety investigation. Further review of the 2017 owner's manuals for all Silverado and Sierra cab configurations confirmed that the owner's manual for the regular-cab configuration was the only manual missing the required child-restraint section. On July 27, 2017, GM's Safety and Field Action Decision Authority decided to conduct a noncompliance recall.
