☐ Not sequential**Description of Defect :**

Description of the Defect : The quick release valve installed on the recall population has a diaphragm that is not intended for use with constant pressure in the supply side of the brake system. When used under constant pressure, the diaphragm may degrade and develop pin holes. These pin holes, if they develop, allow air to escape from the exhaust port of the quick release valve. The loss of air from the quick release valve may allow the emergency brakes to gradually apply.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : A gradual application of the emergency brakes may cause them to drag, increasing the risk of property loss or injury, especially if the brake drag were to cause the vehicle to come to a full stop.

Chronology :

- (a) In July 2017, Cheetah received a customer complaint about a leaking quick release valve.
- (b) Between July 2017 and August 2017, Cheetah received two more complaints from the same customer regarding leaking quick release valves.
- (c) In August 2017, upon review of photos forwarded by the customer, Cheetah determined that the valve diaphragm was degrading and sent several photos of the valves to Tramec Sloan LLC, the valve supplier, for analysis.
- (d) In mid-September, Cheetah received a complaint about a leaking quick release valve from a second customer.
- (e) On September 26, 2017, Tramec Sloan LLC notified Cheetah that the cause of the diaphragm degradation was constant pressure on the valve by the supply air from the brake system.
- (f) On September 28, 2017, after review of the brake system plumbing, Cheetah determined that a potential safety defect existed.

Description of Remedy :

Description of Remedy Program : Cheetah will supply customers with repair kits for the installation of heavy duty diaphragms in the quick release valves. The remedy plan will be set forth in greater detail in the proposed customer notification letter to be provided to NHTSA within 45 days from the date hereof. Cheetah will notify all affected customers within 5 days of NHTSA's approval of the proposed customer notification letter.
