Chronology :

Nissan was notified of a possible rear seat non-conformance by a supplier. As part of the investigation, validation testing and part simulation was performed, and the population of potentially affected vehicles was identified.

Based on this study, Nissan determined that the condition may cause some of the subject vehicles to not meet certain performance requirements of FMVSS No. 207 and FMVSS No. 210; and that it would conduct a recall to remedy the rear seat assemblies.

Description of Remedy :

Description of Remedy Program : Owners of all potentially affected vehicles will be notified to take their vehicle to a Nissan dealer. The dealer will inspect the seat frame barcode and replace the lower seat frame assembly with a new one if affected.

We do not plan to put a statement in the Part 577 owner notification concerning reimbursement for the cost of obtaining a pre-notification remedy as the subject vehicles are under warranty.
