VIN Range 1 : Begin :

NR

End : NR

Not sequential

Description of Defect :

Description of the Defect : According to the Defect Information Report submitted by Kidde “the fire extinguishers may become clogged or require excessive force to activate. In certain models, the nozzle may detach from the valve assembly with force that it could cause injury and fail to discharge.”

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : According to the Defect Information Report submitted by Kidde “If a fire extinguisher does not function properly, it is possible that someone could be injured or killed in a fire.”

Description of the Cause : N/A

Identification of Any Warning that can Occur : None

Supplier Identification :

Component Manufacturer

Name : Walter Kidde Portable Systems, Inc.

Address : 1016 Corporate Park Drive

Mebane NORTH CAROLINA 27302

Country : United States

Chronology :

On October 11, 2017, Forest River received a copy of a Stop-Sale notice (dated October 5, 2017) from its Kidde distributor which advised that Kidde had decided to initiate a stop-sale of certain models of plastic handle and “pindicator” push button disposable fire extinguishers. The same day it received the stop-sale notice, Forest

River halted vehicle production and initiated a stop-ship across its manufacturing plants for any vehicles with the affected models of Kidde fire extinguishers. Forest River also posted the Kidde stop-sale notice to its dealer portal. Forest River communicated with NHTSA about the Kidde recall on October 11, 2017. On November 2, 2017, Forest River became aware of a NHTSA and CPSC recall filed by Kidde through its review of the NHTSA and CPSC websites and through media reports. From November 3 - 20, 2017, Forest River communicated with representatives of Kidde to better understand the details of the recall and remedy program. Although to date Forest River has not received a formal customer notification from Kidde. On November 22, 2017, Forest River decided to conduct a vehicle recall in order to implement the safety recall announced by Kidde with regard to subject fire extinguishers installed as original equipment in Forest River vehicles.

Description of Remedy :

Description of Remedy Program : Vehicle owners will be sent a notification letter which explains how to locate and identify whether the fire extinguisher is included in Kidde Recall 17E-062. Owners will be instructed to contact Kidde directly for a replacement fire extinguisher, free of charge, via Kidde customer service toll-free at 1-855-271-0773, or online at www.kidde.com and click on "Product Safety Recall" for more information. Forest River will provide Kidde with affected VIN ranges and Kidde will issue timely recall notices to Forest River's owners and dealers. Kidde will provide all quarterly recall completion rate reports to NHTSA.

Per preliminary conversations with Kidde and NHTSA, Kidde will provide one blanket dealer notification letter to dealers. Affected dealers will be primarily identified by the Recreational Vehicle Dealers association (RVDA) and the Recreational Vehicle Industry Association (RVIA) and Forest River will provide Kidde with a separate list of non-RVDA member dealers. The notification letter will cover all recreational vehicle manufacturer recalls for the Kidde Recall 17E-062 and is intended to minimize confusion at the dealer level and prevent multiple notification letters from multiple manufacturers. The dealer recall notification will also be posted to Forest River's dealer web portals.

How Remedy Component Differs from Recalled Component : According to Kidde's Defect Information Report, the replacement fire extinguishers will contain a metal, rather than a plastic, valve.

Identify How/When Recall Condition was Corrected in Production : N/A

Recall Schedule :

Description of Recall Schedule : Forest River will provide Kidde with a list of affected VIN ranges. Kidde will issue customer and dealer notification letters.

Planned Dealer Notification Date : JAN 18, 2018 - JAN 18, 2018
