Description of Noncompliance :

Description of the Noncompliance : Daimler AG ('DAG') has determined that certain S-Class, GLE-Class, GLS-Class vehicles (222,166, 292 platform) the left rear door lock may indicate a locked position when, the door is not locked.

FMVSS 1 : 206 - Door locks and door retention components

FMVSS 2 : NR

Description of the Safety Risk : If the interior or external door handle of the left rear door of the vehicle is operated while the door lock is in the locked position, the door may still open and may not meet FMVSS 206 S4.1.3.2.

Description of the Cause : Due to a production deviation at a supplier, certain door locks (max. 1%) might not completely lock as intended.

Identification of Any Warning that can Occur : NR

Supplier Identification :

Component Manufacturer

Name : Kiekert AG

Address : Hoeseler Platz 2
Heiligenhaus FOREIGN STATES 42579

Country: Germany

Chronology :

In May 2017, a single vehicle within the assembly plant was identified with the issue described above. Initial investigations were started with the supplier to check the potential root cause of the issue. In June 2017, it was determined that a faulty riveting parameter at the supplier's production plant led to the defect. In mid-2017, DAG and the supplier reviewed logistics documents to identify potentially affected door locks. In addition, plant actions for all concerned production plants were issued. In September 2017, DAG performed additional analysis to assess potential effects. In December 2017, DAG determined that a potential non-compliance could not be ruled out.

Description of Remedy :

Description of Remedy Program : As a precautionary measure an authorized Mercedes-Benz dealer will check the left rear door lock on the affected vehicles and replace them, if necessary. Pursuant to 49 C.F.R. § 577.11 (e), MBUSA does not plan to provide notice about pre-notice reimbursement to owners since all involved vehicles remain covered under the new vehicle warranty.

How Remedy Component Differs from Recalled Component : Correct door locks built within supplier specifications.

Identify How/When Recall Condition was Corrected in Production : A change in the production procedure of our supplier ensures that this issue can no longer occur from June 21st, 2017 onwards.

Recall Schedule :

Description of Recall Schedule : Dealers will be notified of the pending voluntary recall campaign in January 2017. A copy of all communications will be provided when available. Owners will be notified with an interim letter in January and again when parts are available in February 2017, approximately one week after recall launch to the dealers.
