**REF:** **Awareness Communication - Upcoming Safety Recall 17S01**

Dated: January 12, 2017

**REF:** **Safety Recall 14S28 – Supplement #3**

Certain 2005-2006 Ford GT Vehicles Operated in High Absolute Humidity Locations  
Passenger Airbag Inflator Replacement

### **REASON FOR THIS SAFETY RECALL**

NHTSA and Takata have determined that the propellant in certain Takata airbag inflators can experience an alteration over time with exposure to certain climate conditions. A combination of time, high temperature fluctuations, and humidity contribute to the degradation of the propellant in the inflators. This degradation can cause the propellant to burn too quickly, creating high pressure inside the inflator, and in extreme cases causing the inflator to rupture in the event of a crash necessitating airbag deployment. A ruptured inflator can send inflator parts toward vehicle occupants resulting in serious injury or death. Additional information regarding Takata recalls can be found at [www.nhtsa.gov](http://www.nhtsa.gov) and [www.safercar.gov](http://www.safercar.gov).

### **SERVICE ACTION**

A complete Dealer Bulletin will be provided to dealers when parts ordering information and repair instructions will be available to support this safety recall.

### **CUSTOMER NOTIFICATION**

Owner Letters are expected to be mailed the week of February 27, 2017, informing owners that parts are not available to repair their vehicles. Owners of record will be notified via first class mail after repair instructions and parts ordering information have been provided to dealers.

### **PLEASE NOTE:**

**Federal law requires dealers to complete this recall service before a new vehicle is delivered to the buyer or lessee. Violation of this requirement by a dealer could result in a civil penalty of up to \$21,000 per vehicle. Correct all vehicles in your new vehicle inventory prior to delivery.**
