Subject	2007-11 CR-V Front Passenger's Airbag Inflator Kit - Do Not Install Request
----------------	---

American Honda has identified a concern with the following airbag inflator kit:

Part Number	Part Description	Action
04790-SWA-407	2007-11 CR-V Front Passenger's Airbag Inflator Kit	Inspect Before Installation

This kit is part of service bulletins:

16-048: *Safety Recall: Takata Front Passenger's Airbag Inflator (Phase 1); and*

17-002: *Safety Recall: Takata Front Passenger's Airbag Inflator (Phase 2)*

Prior to beginning repair on any 2007-11 CR-V vehicle with part number 04790-SWA-407, ensure that the wire harness included in the kit is correct according to the attached image.

- If the wire harness is correct, you may proceed accordingly and install the inflator kit per the applicable service bulletin.
- If the harness does not match the correct image, keep the kit separate from your other stock and await further instructions. Do **not** replace the incorrect harness with a harness from another kit; you **must** keep the incorrect harness within the inflator kit packaging that it was originally shipped.

Please click [here](#) for the attached image.

Additional information will be provided in an update later this week. Thank you!

This is the correct wiring harness you should see for this kit. The red wire should run through the full length of the harness from the 4 pin prong to the 2 pin prong.

GOOD

GOOD

Red wire should run from the 4 pin to 2 pin prong

2 pin prong

4 pin prong

This is the incorrect wiring harness. The yellow wire was INCORRECTLY installed. (DO NOT USE!)

NO GOOD
