IMPORTANT SAFETY RECALL

NHTSA Recall Campaign # 17V-350

Dear Valued Dealer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Jayco has determined that certain Model Year 2018 Eagle 330RSTS (EA) travel trailers manufactured May 4 through May 10, 2017 fail to conform to the requirements of Federal Motor Vehicle Safety Standard No. 120, "Tire selection and rims and motor home/recreation vehicle trailer load carrying capacity information for motor vehicles with a GVWR more than 4,536 kilograms (10,000 pounds)". Due to error of data entered to calculate the Gross Axle Weight Rating (GAWR) the affected travel trailers, have incorrect information printed on the Federal ID Label. The affected travel trailers have 15" tires while the data noted 16" tires, subsequently overstating the GAWR at 580 lbs. when only 5660 lbs. This error creates the possibility that the vehicle could be loaded with the amount of cargo as stated and result in the vehicle being overloaded. Overloading may lead to issue with drivability and premature tire wear and subsequent tire failure, increasing the risk of personal injury or property damage.

The remedy is to replace the Federal Label with a label that notes GAWR as 5660lbs.
