«Country»

Dear «Dealer_name»,

Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2018 Dutchmen Coleman Travel Trailers. As a result, Keystone RV is conducting a safety recall.

***Reason for
this recall***

It has been determined that on some 2018 Coleman models built in plant 840 have the incorrect type of wire connectors used to attach the 110 volt wiring at the A/C control box. If the wires come loose and short together, there is an increased risk of damage or fire to the unit. The vehicles included in the recall are:

2018 Dutchmen Coleman, All Models Serial Number Range: JM931332 – JM931665

Our records indicate unit(s) sold or in your present lot inventory fall within this range, which will require immediate preventative action. **Important:** If some of the units are still in your inventory, Federal Law requires you to complete the recall service on those units before retail delivery. The unit VIN(s) our records indicate are presently in your inventory or have been sold are as follows:

«VIN1» «VIN2» «VIN3» «VIN4»
«VIN5»

-- Serial numbers with '*' have been retail sold --

Claims for the units which have been serviced must be submitted. Claims submitted will be used by Keystone to record recall service completions and provide dealer payments. Enclosed is a copy of the Safety Advisory #17-291, which details how to remedy the situation and the proper reimbursement procedures.

We apologize for any inconvenience this situation may cause and greatly appreciate your cooperation. Should you have any questions or concerns regarding this correspondence or the enclosed Safety Advisory, please feel free to contact us.

Sincerely,

KEYSTONE RV COMPANY

Rick Deisler
