New Safety Recall Advanced Communication – T4507112017

FCA US LLC (FCA US) has announced a safety recall on certain 2017 (DS) Ram 1500 Pickups equipped with a 32 Gallon Fuel Tank (Sales Code NFX) built at the Warren Truck Assembly Plant.

Some of the above vehicles may have been assembled with a broken fuel tank control valve. A broken fuel tank control valve may allow fuel to leak from the fuel tank in the event of a rollover. Fuel leaking from the fuel tank with the vehicle inverted is potentially non-compliant with Federal Motor Vehicle Safety Standard (FMVSS) No. 301, “Fuel System Integrity”.

FCA US will conduct a voluntary safety recall to replace the fuel tank on all affected vehicles.

Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 3rd Quarter of 2017.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
