Dear «Dealer\_name»,

Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2016-2018 Keystone Springdale and Summerland Travel Trailers. As a result, Keystone RV is conducting a safety recall.

***Reason for  
this recall***

It has been decided that the wiring to the 12V breakers located by the battery may not be connected to the protected side of the breaker. If this condition exists it will lead to an increased risk of fire if an electrical short should occur on the unprotected circuit. If the wire leading to the electric stabilizer experiences a short there is an increased risk of fire and/or property damage. The vehicles included in the recall are:

Our records indicate unit(s) sold or in your present lot inventory fall within this range, which will require immediate preventative action. **Important:** If some of the units are still in your inventory, Federal Law requires you to complete the recall service on those units before retail delivery. The unit VIN(s) our records indicate are presently in your inventory or have been sold are as follows:

«VINI»

-- Serial numbers with '\*' have been retail sold --

Claims for the units which have been serviced must be submitted. Claims submitted will be used by Keystone to record recall service completions and provide dealer payments. Enclosed is a copy of the Safety Advisory #17-299, which details how to remedy the situation and the proper reimbursement procedures.
