

Mitsubishi Motors North America, Inc. PARTS BULLETIN

SUBJECT: ELECTRICAL POWER CONTROL RELAY – SAFETY RECALL CAMPAIGN	No: ER-LO-01-17
	Date: October, 2017
	Model: SEE BELOW

PURPOSE:

This bulletin outlines the part allocation for safety recall SR-17-005.

Due to an inappropriate maintenance procedure used on a welding machine at a relay supplier, welding of components within the relay may have been performed incorrectly resulting in improper electrical conduction. As a result, one of the following conditions may occur depending on which system is using the defective relay:

- If the relay for the engine control unit fails, the engine will stall while driving and cannot be restarted.
- If the relay for the engine valve lift control fails, the engine warning lamp will illuminate and fail-safe mode will be activated, limiting available engine power.
- If the relay for the radiator fan fails, the engine coolant temperature will rise, the coolant temperature warning lamp will illuminate, and the engine may overheat.

Please reference SAFETY RECALL CAMPAIGN BULLETIN **SR-17-005** for repair instructions. The recall campaign operations are **C1705A**, **C1705B** and **C1705C**.

AFFECTED VEHICLES:

- 2015 - 2017 Outlander vehicles built December 5, 2014 - August 24, 2016**
- 2015 - 2016 Lancer vehicles built December 5, 2014 - March 3, 2016**
- 2015 - 2016 Outlander Sport vehicles built October 15, 2014 - July 8, 2016**
- 2015 Lancer Evolution vehicles built December 5, 2014 - December 24, 2015**

IMPORTANT

Affected new or used inventory vehicles must be repaired before the vehicle is sold/delivered. Dealers must check their inventory vehicles' VINs on the Warranty Super Screen to verify whether the vehicle is involved in this recall campaign. It is a violation of Federal law for a dealer to sell/deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by the notification under a sale or lease until the defect or noncompliance is remedied.
