

SAFETY RECALL # 17V-620

To: All Grand Design RV Dealers

October 23, 2017

Grand Design RV has decided that a safety defect exists in certain 2017 and 2018 Imagine model vehicles. Accordingly, a recall to address this issue is being initiated effective October 23, 2017.

The defect involves **Imagine Travel Trailers** manufactured between **January 9, 2017 and August 15, 2017**. The **VIN range** of affected units is **573TE3329H6600420 through 573TE3221J6604792**. *All units within this VIN ranges are affected.*

On affected vehicles, the wiring in the Air Conditioner may have incorrectly installed bell cap connectors in the 110V circuit. As a result, the wires may detach from the connectors. If this were to occur, the potential exists for the wires to create a direct short in the electrical system, resulting in a potential fire and personal injury. Repair involves removing all three bell cap connectors in the 110V circuit at the Air Conditioner unit and reattaching the wires using a new style connector. The new connectors are available in stock for immediate shipment.

Owners of affected vehicles will be notified of this recall by mail from Grand Design RV. A copy of the Owner Notification Letter is attached for your reference. Also attached is a list of your retail sold and stock units affected by this recall. Finally, please find attached the repair and claim filing instructions associated with this recall action.

Please be reminded that it is a violation of Federal Law for you to sell or lease the products covered by this notification until repair under this recall has been performed. Substantial civil penalties apply to violations of this law. Your assistance with this recall is appreciated. Should you have any questions or concerns, please contact Grand Design Customer Service at 574-825-9679.

Respectfully,
GRAND DESIGN RV, LLC
