RE: Mirage SRS Warning Lamp Illumination Safety Recall Campaign
ATIN NO. ATIN-17-SR-006-A

AFFECTED VEHICLES: Certain 2014-2018 Mirage vehicles

PURPOSE

A safety recall campaign will be conducted on certain 2014 – 2018 Mirage vehicles built from July 27, 2013 to September 4, 2017, for potential SRS Warning Lamp Illumination. **It is a violation of Federal law for a dealer to sell or deliver any affected vehicles in your new vehicle inventory until this recall has been performed.** Please check the Most Recent: Open Campaign List e-report to identify affected vehicles in your new vehicle inventory.

The self-diagnostic function used by the internal acceleration sensor in the SRS-ECU may misinterpret vibration caused by severe road conditions and/or driving on a flat tire to be a malfunction in the SRS-ECU. If this occurs, the SRS warning lamp will illuminate and none of the seven airbags available in the vehicle will deploy in the event of a crash, increasing the risk of injury or death in a crash.

Dealers are requested to reprogram the SRS-ECU software with countermeasure software posted for download to MEDIC today. Recall Campaign Bulletin SR-17-006, outlining the SRS-ECU reprogramming procedure, will be made available today on MDL and MEL.

Notification letters are scheduled to be mailed to owners of affected vehicles, beginning November 10, 2017, requesting they contact their local Authorized Mitsubishi dealership to schedule an appointment to have this recall performed.

Dealers must review the Warranty Superscreen to confirm if any vehicles in their new or used vehicle inventories are affected, and conduct this campaign prior to delivering them. When checking for applicability of this campaign (C1706M), **please check for any other open campaigns. Some affected vehicles may have SR-15-011, SR-16-001, and/or SR-16-008 recalls still open. Please ensure you have adequate inventory of affected parts to complete all open recalls.** Always obtain the customer's approval before completing a campaign on a customer owned vehicle.

IMPORTANT

Affected new or used inventory vehicles must be repaired before the vehicle is sold/delivered. Dealers must check their inventory vehicles' VINs on the Warranty Super Screen to verify whether the vehicle is involved in this recall campaign. It is a violation of Federal law for a dealer to sell/deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by the notification under a sale or lease until the defect or noncompliance is remedied.
